NCCM® V-SERIES

Long-Life Nonwoven Wipes and Bars

Unique nonwoven technology for sweeping and wiping applications
NCCM® V-Series
Unique nonwoven technology for sweeping and wiping applications

NCCM® V-Series nonwoven bars and wipes take the place of rubber, felt or cork products in a variety of material handling applications. As a versatile, high-value solution for consistent and long-lasting performance, the V-Series replaces easily-gouged and damaged traditional materials. Cost savings are often realized due to the minimization of costly line downtime for traditional bar replacements. In addition, the uniform, even-edged and long-lasting performance of the V-Series increases product processing quality. Compressibility also contributes to NCCM® Mill Wipe and Wiper Bar II success as the material maintains tight and uniform contact with uneven surfaces and varying thicknesses.

**NCCM® Mill Wipe** is an excellent choice for oxide and debris removal as well as other sweeping, wiping and cleaning applications.
