

NCCM keeps expanding in Europe!

NCCM proudly announces the expansion of its European roll service center in Montornès del Vallès, Barcelona/Spain with an increase of operation space to 12,000 sq. ft. Since the start up in 2017, the Spanish site has been providing roll and shaft manufacturing, engineering and sales plus a 360° best-in-class service to our direct customers in the automotive and metals processing industry on the old continent. The same time NCCM Spain became

a highly specialized expert to design, build and service complete high performance rolls for OEM's and machine builders.

In close cooperation with our service centers in Dearborn, MI USA and Shanghai, China as well as with the River Falls, WI USA headquarters, NCCM Spain keeps playing a key role in our global expansion servicing customers today in the Middle East region, on the African continent and even far away in Australia. The latest step of this exciting journey was a recent upgrade of the logistics capabilities as we have now centralized the service of our entire European VAR and Distribution network through NCCM Spain in Barcelona.

"This next investment into the transformation and extension of our European business infrastructure is another clear sign of the commitment the Niccum Family has on growing our business globally!" says the founder, owner and CEO, Brent Niccum.
